Volume 8 1982 Table of Contents

No. 1 Sickle Cells (I)

pp. 1–192 issued on June 9, 1982

1. Rheology and Heterogeneity of Sickle Erythrocytes

M.E. Fabry, R.L. Nagel: Heterogeneity of Red Cells in the Sickler: A Characteristic with Practical Clinical and Pathophysiological Implications 9
Commentary 14

M. Bessis, C. Feo, E. Jones: Quantitation of Red Cell Deformability During Progressive Deoxygenation and Oxygenation in Sickling Disorders (The Use of an Automated Ektacytometer) 17
Discussion 25

H. Schmid-Schönbein: Continuous Viscous Deformation of Red Blood Cells in Flow and Their Disturbance in Sickle Cell Disease 29
Discussion 44

S. Chien, R.G. King, A.A. Kaperonis, S. Usami: Viscoelastic Properties of Sickle Cells and Hemoglobin 53
Discussion 61

C. Pfafferott, R. Wenby, H.J. Meiselman: Morphologic and Internal Viscosity Aspects of RBC Rheologic Behavior 65
Discussion 76

S.T. Ohnishi: Viscosity and Filtrability Measurements of Sickle-Cell Suspensions in the Development of Anti-Sickling Drugs 79
Commentary 85

H. Schmid-Schönbein, H. Heidtmann: Nonspecific Rheological Abnormalities in Sickle Cell Disease 89
Commentary 100

S. Charache, S. de la Monte, V. MacDonald: Increased Blood Viscosity in a Patient with Sickle Cell Anemia 103
Commentary 109

2. Microcirculation Dynamics of Sickle Cells

H. Lipowsky, S. Usami, S.Chien: Human SS Red Cell Rheological Behavior in the Microcirculation of the Cremaster Muscle 113
Discussion 124

S. Baez, D.K. Kaul, R.L. Nagel: Microvascular Determinants of Blood Flow Behavior and HbSS Erythrocyte Plugging in Microcirculation . . . 127
Discussion 137

F.F. Vargas, G.L. Blackshear: Vascular Resistance and Transit Time of Sickle Red Blood Cells 139
Discussion 143

R. Skalak: Theoretical Models of Capillary Flow 147
Discussion 151

S.A. Berger, W.S. King: Diffusion and Convection in the Capillaries in Sickle Cell Disease 153
Commentary 161

R.P. Hebbel, J.W. Eaton, M.H. Steinberg, J.G. White: Erythrocyte/Endothelial Interactions in the Pathogenesis of Sickle–Cell Disease . . . 163
Discussion 172

P.P. Klug, N. Kaye, W.N. Jensen: Endothelial Cell and Vascular Damage in the Sickle Cell Disorders 175
Commentary 184

Free Communication

D. Koeller, J. DeSimone, P. Heller: Failure of D-Thyroxine to Increase Fetal Hemoglobin Levels in Normal and Anemic Baboons 187
E.L. Alpen: Commentary 191

No. 2 Sickle Cells (II)

pp. 193–474 issued on November 26, 1982

Molecular and Cellular Mechanisms of Sickling

R.W. Briehl: The Effects of Shear on the Delay Time for Gelation of Hemoglobin S 201
Discussion 210

K. Adachi, T. Asakura: Kinetics of the Polymerization of Hemoglobin in High and Low Phosphate Buffers 213
Discussion 223

C.T. Noguchi, D.A. Torchia, A.N. Schechter: Determination of Sickle Hemoglobin Polymer in SS and AS Erythrocytes 225
Discussion 233

M.A. Goldberg, A.T. Lalos, B. Himmelstein, H.F. Bunn: Effects of Red Cell Membrane on the Polymerization of Sickle Hemoglobin 237
Discussion 242

A.Y. Tehrani, Y.F. Lam, A.K.L.C. Lin, S.F. Dosch, C. Ho: Phosphorus-31 Nuclear Magnetic Resonance Studies of Human Red Blood Cells 245
Discussion 260

J. Kumpati, R.S. Franco, M. Weiner, O.J. Martelo: Sickling as a Function of Oxygen Delivery: Effect of Simulated Transfusions of Stored, Fresh and Inositol-Hexaphosphate-Loaded (Low Affinity) Red Cells 263
Commentary 271

C.L. Natta, L.T. Kremzner: Polyamines and Membrane Proteins in Sickle Cell Disease 273
Commentary 279

Antisickling Agents

L.R. Berkowitz, E.P. Orringer: Effects of Cetiedil on Monovalent Cation Permeability in the Erythrocyte: An Explanation for the Efficacy of Cetiedil in the Treatment of Sickle Cell Anemia 283

W.F. Schmidt, T. Asakura, E. Schwartz: The Effect of Cetiedil on Red Cell Membrane Permeability 289
Discussion 296

J.A. Kark, R. Bongiovanni, C.U. Hicks, P.G. Tarassoff, J.S. Hannah, G.Y. Yoshida: Modification of Intracellular Hemoglobin with Pyridoxal and Pyridoxal 5'-Phosphate 299

J. Kuranstin-Mills, L.S. Lessin: Rheological Assessment of Antisickling Effects of Pyridoxine and Pyridoxal 315
Commentary to the papers of Kark et al., and Kuranstin-Mills and Lessin 326

R.M. Rosa, B.E. Bierer, H.F. Bunn, F.H. Epstein: The Treatment of Sickle Cell Anemia with Induced Hyponatremia 329
Discussion 334

S.T. Ohnishi: Antisickling Effects of Membrane-Interacting Compounds 337

D.J. Abraham: Correlation of Partition Coefficients with Antisickling Activity of Simple Alcohols, Amines and Ureas 345
Commentary to the papers of Ohnishi and Abraham 354

Historical Annotation

M. Bessis and G. Delpech: Sickle Cell Shape and Structure: Images and Concepts (1840–1980) 359

Free Communications

C. de Montpellier, G. Cornu, J. Rhodhain, G. Sokal, M. Symann: Myeloid Stem Cell Kinetics in Children Hypertransfused During Remission Induction of Acute Lymphoblastic Leukemia 439
L. Lajtha: Commentary 445

G. Dighiero, R. Mayzner, J.P. Roisin, J.L. Binet: Automated Recognition of B and T Lymphocytes by Immunoperoxidase on the Hemalog D System and its Applications 447
M. Greaves: Commentary 455
G. Dighiero: Answer to Commentary 457

Letters to the Editor

H.E. Wichmann, M. Loeffler: A Solution to the Controversy on Stem Cell Regulation 461

A. de Boisfleury-Chevance, C. Allard: Scanning Electron Microscopy of the Spleen in a Case of Sickle Cell Anemia 467

G. Brecher: A Further Note on Red Cell Discoveries: William B. Castle's Contribution to the Discovery of Hemoglobin S 471

S.A. Berger: Diffusion and Convection in the Capillaries in Sickle-Cell Disease (Answer to Commentary) 473

No. 3 Therapy of Leukemia (I): Is It Rational?

pp. 475–622 issued on December 14, 1982

Introduction

Jean Bernard and M. Bessis: Some Thoughts on the Rationale of Antileukemic Therapy 477

Critical Appraisal of Current Therapy

E. Beutler, R. McMillan: Bone Marrow Transplantation in Acute Leukemia 485
Discussion 495

C.D. Bloomfield, D.C. Arthur: Evaluation of Leukemic Cell Chromosomes as a Guide to Therapy 501
Discussion 514

P.J. Burke, J.E. Karp, W.P. Vaughan, P.L. Sanford: Recruitment of Quiescent Tumor by Humoral Stimulatory Activity: Requirements for Successful Chemotherapy 519
Discussion 532

T.M. Fliedner, D. Hoelzer, K.H. Steinbach: Blast Cell and Granulocyte Production in Human Leukemia: Pathophysiological Concepts Based on Computer Simulation Using Discrete Modeling Techniques 535
Discussion 547

D.W. Ross, A. Bardwell: White Cell Differential: Coupling of Cell Types in Patients Undergoing Chemotherapy
Discussion of Fliedner et al. paper 549

A.M. Mauer: Current Therapy for Acute Lymphocytic Leukemia: Is it Rational? 553
Discussion 559

R. Mertelsmann, M.A.S. Moore, B. Clarkson: Leukemia Cell Phenotype and Prognosis: An Analysis of 519 Adults with Acute Leukemia 561
Discussion 581

H.D. Preisler: Treatment Failure in AML 585
Discussion 601

P. Stryckmans, A. Delforge, D. Bron, M. Malarme, L. Debusscher, S. Suciu, E. Ronge-Collard: Scientific Basis and Criticism of Current Therapy of Acute Leukemia 603
Discussion 618
